

BI Premium for Public Safety 2.1 Issued Resolved

	<b>CR #</b>	<b>Component</b>	<b>Summary</b>	<b>Description / How to Reproduce</b>	<b>Type</b>
1.	1-53Q2UZ	Reports CAD - BI PS	Response Time Statistics – Excel format doesn't display entire data.	When a report was saved in Excel format, the labels were omitted from the X-axis of the graphs, and certain other labels on the report were also missing. The upgrade to 4.0 has corrected this problem.	Product Defect
2.	1-5MUMT4	Reports CAD - BI PS	Officer Activity- Able to see all the employees in Employee prompt with secured user.	Steps to reproduce: 1. Login to InfoView as a secured user (LMPD). 2. Invoke Officer Activity report. For Employee prompt, observe that all the employees are displayed. Expecting the LOV should display the employees related to that agency.	Product Defect
3.	1-5OCLYQ	ETL CAD - BI PS	Add support for partial hour offset Time Zones.	For sites where the standard time is a partial hour offset from UTC, the BI offset now supports fractions (such as - 5.75 for Nepal which is UTC+5:45.) Note that the BI offset is expressed as a decimal number, so .5 for a 30 minute offset, and as before, the specified offset is applied to local time to get UTC. As another example, Newfoundland is UTC-3:30, and its BI offset would be +3.5 for Standard time.)	Product Defect
4.	1-5YESGG	Reports CAD - BI PS	Case Number report query takes a long time to return data.	The Case Number report is taking a long time to return data in CAD 9.1.1 SQL Server environment. For 15 days, it takes approximately 10 minutes. It took 602 seconds (approximately 10 minutes) to retrieve 1859 records for a 15-day date range.	Doc Defect
5.	1-6M6BZV	Universe CAD - BI PS	Corrected a Chasm trap that allowed users to select objects that were not compatible in	Corrected a Chasm trap that allowed users to select objects that were not compatible in the Universe. This would produce a #MULTIVALUE measure for Unit	Doc Defect

			the Universe. This would produce a #MULTIVALUE measure for Unit Response Time.	Response Time.	
6.	1-6NNHZ8	Reports CAD - BI PS	InfoView menu bar is not visible after InfoView is restored after leaving it idle until session time	Steps to reproduce: 1. Login to infoview. 2. Create an adhoc report with the mandatory objects selected. 3. Leave InfoView idle until it timesout. 4. Try to place a map on the report. The session timed out message appears. 5. Click Restore to retrieve the session. The session is retrieved but the menu bar at the top is not visible.	Product Defect
7.	1-6NQV3R	Reports CAD - BI PS	Menu toolbar (along with Intergraph logo) is not visible in InfoView.	The Menu toolbar (along with the Intergraph logo) is not visible in InfoView and there is no option to log out of the opened report after it is left idle for a long time.	Doc Defect
8.	1-6NQV55	Dashboard CAD - BI PS	Error on dashboard upon leaving it idle for long	Steps to reproduce: 1. Invoke the Hourly Call Volume dashboard or the Average Call Handling Times dashboard and leave it idle. Observe a 'Cannot Access External Data' pop-up saying Java.Lang.NullPointerException message displayed.	Product Defect
9.	1-7QGW3N	Reports CAD - BI PS	All COTS reports – Included is a default to Intergraph Public Safety.	The Customer Info query is now referenced in the prompts, with a default of "Default". At a site where all reports are to be the same agency/header, the desired information and logo should be inserted into the default row of the CustomerInfo table. If multiple headers and	Product Defect
