

## 6.5.0 Release Issues Resolved

	CR #	Product	Summary	Description / How to Reproduce
1.	1-KPBEUV	EdgeFrontier	EdgeFrontierSystemProcess_Default.exe crashing	We are seeing cases where the DEFAULT system process crashes when XML is submitted with several repeated elements. Note that we have disabled all Managed Calls from the system, and the crash still occurs. Small XML files with few repeated elements work OK, but with more repeated elements the default system process crashes.
