

## PRODUCT OVERVIEW

Hexagon Safety & Infrastructure®'s Intergraph InPursuit® WebRMS provides an enterprise-level records management solution to centrally store and manage extensive volumes of information across a law enforcement agency's operational environment. It features an easy-to-use application accessed via a standard web browser that delivers efficient data collection from the field, as well as the ability to access and evaluate records data anywhere. InPursuit WebRMS offers flexible and highly customizable records management that meets unique single- and multi-agency requirements, provides complete data governance, and is cost-effective to deploy.

## VERSION OVERVIEW

In the January 2019 release, the Global Product Center delivers significant customer-focused enhancements to InPursuit WebRMS. Learn more in the [Release Notes](#).

## LICENSING & DISTRIBUTION

InPursuit WebRMS and Intergraph® WebJMS modules require a Reprise license, which is licensed per number of concurrent users. Premium maintenance is available.

For more information, visit [Licensing Resources](#).

## DEPENDENCIES

- Reporting features for jail management require SQL Server Reporting Services.
- The WebJMS module requires InPursuit WebRMS Client and Server.
