

PRODUCT OVERVIEW

Intergraph® Planning & Response is an application for managing major incidents and events. It integrates and coordinates resources, procedures, and communications for individual agencies or across jurisdictions and tiers of command. Intergraph Planning & Response comprehensively fulfills incident command system requirements. It harnesses the collective capabilities of diverse responders and provides a single source of information throughout the entire life cycle for safe, efficient, and effective operations.

VALUE PROPS

Intergraph Planning & Response is a single, unified solution for all agencies, needs, and stages of operation. It supports incident command on scene and in both tactical and emergency operations centers.

By allowing all authorized responders to access the system, Intergraph Planning & Response maintains common understanding of the situation and operations. It continually monitors situations and quickly adapts all aspects of the operation to ensure agencies maintain control, even in rapidly changing situations. The solution also alerts users to changes in command structures, objectives, assignments, and action plans.

VERSION OVERVIEW

Intergraph Planning & Response version 4.1 features the following updates:

- Core Enhancements
 - Support for multiple time zones
 - Updates to parameter configurations (e.g., default configurations with delivery)
 - GPS improvements
- Platform Developments
